DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ke (5,963,262).

Regarding claim 14, Ke shows a plurality of subtracters (352,354,356,358), which meet the step of determining an interval given by the output signal values as claimed (see col. 9, lines 3-5), a plurality of limiters (362,364,366, 368), which meet the step of determining the position of the intermediate value plotted relative to interval limits (see col. 9, lines 44-52), and a flicker reduction filter (304), which meets the step of mixing as claimed (see col. 8, lines 44-48). It should be noted that the y_2 in the flicker reduction equation of filter 304 represents the intermediate value and the final result Y_r represents the interpolated intermediate value (see col. 8, lines 49-56).

Allowable Subject Matter

3. Claims 1-13 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: Prior art does not teach or suggest the step of selecting at least one third pixel, the step of determining the position of the third image information value, and the step of mixing as recited in claim 1.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ji et al. (6,686,923) shows a difference calculator.

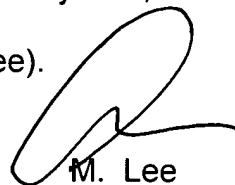

Rabii (5,081,532) shows a 3D interpolator.

Knee et al. (5,504,531) shows a combiner.
